

# Talk Straight | Schools Broadband Shortlisted for ISPA Awards 2019: Best Cyber Security and Best Customer Solution

We are delighted to announce that we have again been shortlisted for two of the UK's Internet Industry Awards, by the Internet Service Providers Association, The ISPAs.

Competing against hundreds of Internet Service Providers, and one of just 66 nominees, we're thrilled to be selected as a finalist for the Best Cyber Security ISP, together with the Best Customer Solution 2019.

Our hosted cyber security solution provides UK schools and businesses with some of the world's best cyber security from Fortinet, providing protection against advanced persistent threats at a price schools can afford.

Awarded Best Security for the last two consecutive years, David Tindall, CEO comments: "We are thrilled that the Internet Service Providers Association recognises the quality of our robust networks and the true resilience our hosted firewall configurations offer. We are very proud to be part of this prestigious event which is held in such high regard by the entire Internet Service Industry."

ISPA's Secretary General, Nick Lansman, commented: "This year's shortlisted ISPA Awards finalists demonstrate the high calibre and diversity of ISPs across the UK, who continue to drive growth and innovation across the internet industry. We are all looking forward towards an exciting evening which celebrates the best that the UK industry has to offer."

We are proud to protect over 500,000 students in UK schools, using our unique cloud based Next Generation Firewall and content filtering platform.
