

# Nexus Multi Academy Trust

Ian Burns, Information Governance and Strategic ICT Lead at Nexus Multi Academy Trust, shares why Schools Broadband's 4G Filtered Broadband has proved successful for both school and homeworkers.

The introduction of fully managed 4G solutions from Schools Broadband is a massive step forward for their wider ISP provision, enabling customers to protect their clients and staff with DfE compliant filtering. We have deployed a number of devices in temporary educational buildings and for homeworkers with great success. As a result we will be replacing all 4G routers across the MAT with Schools Broadband devices.

Our staff feedback has only been positive with comments around great flexibility, stable connections and fast internet speeds.

As lead for Informational Governance I can be assured that our staff are accessing a fully filtered provision at the appropriate level, that is fully in line with our own internal customised access.

I would like to thank the staff at Schools Broadband and their partner Code Green for continual support and technology developments.
