

Designed especially for schools

Web Filtering & eSafety

## The most advanced web filters available

Our hosted web filtering solution from Netsweeper, provides the world's most accurate and comprehensive filtering classification system, for protecting students and staff from unacceptable online content.

### Supports DfE compliance

Developed specifically for education, we filter billions of categorised URLs, including the Internet Watch Foundation lists and the Home Office Terrorism block list. As such, our filters fully meet school Prevent Duty and DfE regulatory requirements.

Automated filtering updates, protect students from harmful content almost as quickly as it is created.

### Fully customisable control

Providing central filtering control for multi-site schools, control in the classroom, or mobile device management, we provide the flexibility to manage granular filtering policies by user, group, time and day, on and off site.

### Reporting

We allow you to view up to 6 months' worth of historical internet usage and our own back-up system will extend this to 3 years. This information can then be presented to the authorities or the police if required.

## The Benefits

**Our unique hosted platform offers scalability for growth, with zero additional hardware costs.**

Safe search across all popular web search engines including Google, Bing and YouTube

Add your own URLs, keywords, file extensions and URL rewrites

Easy to use and predefined reporting

Powerful custom reports and alerts

Filter activity on hundreds of social media platforms

Tailor internet access by user, IP address, group or domain

Block or allow websites for set periods of time

View historic internet use

Meets Prevent Duty requirements

Integrates with Windows Active Directory, Mac Open Directory, Azure, Google and GSuite

## Effective BYOD Filtering

**Web filtering for mobile devices on or off school sites.**

Schools Broadband mobile filtering allows you to extend your existing filtering policies to your off-network devices. This includes Apple devices, Chromebooks, Netbooks, laptops, Windows tablets, android devices and mobile phones.

The Mobile filter offers exactly the same level of protection and reporting as on-site devices, transparently communicating Internet browser requests from a mobile device to our cloud-based filtering system.

This system references the URL requests with its content data-base and policy settings and either allows or blocks the request.

## 4G Filtered Broadband For Safe Internet Access At Home

**Now that the DfE SIM plans for mobile filtered data have ended, you can still use your existing DfE supplied MiFi routers/dongles with our SIM only solution.**

Our mobile filtering and SIM-only service is designed exclusively for education, providing a safe and filtered learning environment for student home-learning.

Protecting both students and staff from inappropriate online content, the service supports schools' Prevent Duty compliance and KCSIE duties through its easy to use, built-in monitoring, reporting and alert functions.

We also offer a full 4G Filtered service with preconfigured routers/dongles for a "ready to go" experience.

Service delivered via either: SIM Card | Dongle | MiFi Capable Router

Available in monthly data plan increments from 1Gbps to 10Gbps

Rapid provisioning

Short & longer term flexible contracts
